

HOW TO POP DELICIOUS POPCORN

1. Make sure dump handle is hooked onto kettle hanger hook.
2. Turn on kettle & light switches.
3. Allow 4-5 minutes warm up for initial batch.
4. Open kettle lid by lifting plastic knob on left side of kettle and pour or pump 2 ½ fluid ounces of oil into kettle. (We recommend a top quality oil due to higher burn temperatures.)
5. Add 8 ounces of popcorn.
6. Close lid and allow 2-3 minutes cooking time.
7. When corn stops popping, dump immediately.
(To dump, turn dump handle away from operator to release catch pin and push down until all corn dumps.)
8. Repeat as necessary. Average cycle time is 2 ½ - 3 minutes.
9. When popping is complete, turn off kettle switch. Leave light switch on to warm popcorn.
